Jakarta Selatan, DKI Jakarta, 12560

Machine learning engineer with 7 years of experience taking NLP and LLM features from prototype to production, mostly retrieval-based assistants and text classification for Indonesian-language products.

EDUCATION

Institut Teknologi Nusantara **Bandung, Jawa Barat**
Bachelor of Engineering in Informatics | GPA 3.71/4.00 **Aug 2015 - Jul 2019**

- Head of Data Science Study Group, 2017-2018
- Teaching Assistant for the Machine Learning course, 2018-2019

WORK EXPERIENCE

PT Lumen Analytics **Jakarta, Indonesia**
Senior Machine Learning Engineer - Full Time **Apr 2022 - Present**

- Designed a retrieval-augmented generation (RAG) assistant with LangChain and FAISS over 12,000 internal policy documents; answer accuracy rose from 61% to 84% on a 300-question test set.
- Served PyTorch models behind FastAPI services packaged with Docker on AWS, handling 2.4M requests per month at p95 latency under 220 ms.
- Wrote Python and SQL data pipelines on PostgreSQL that cut weekly reporting time from 6 hours to 40 minutes.
- Led 4 engineers and added prompt regression tests for every LLM feature before release.

PT Kopi Data Studio **Bandung, Indonesia**
Machine Learning Engineer - Full Time **Jul 2019 - Mar 2022**

- Fine-tuned Indonesian NLP models for sentiment and topic classification, lifting F1 from 0.71 to 0.83.
- Built a churn model with scikit-learn and XGBoost that helped the retention team reach 18% more at-risk customers.

CERTIFICATION

- AWS Certified Machine Learning - Specialty, Nomor AWSML-4471, 2023
- Natural Language Processing Specialization, Belajar Contoh, 2020

AWARD

- 1st place, Nusantara AI Challenge (text understanding track), 2022
- Finalist, National Data Science Hackathon, 2018

SKILLS

- Hard skill: Python, SQL, PyTorch, LangChain, FAISS, FastAPI, Docker
- Cloud: AWS
- Soft skill: Mentoring, technical writing, stakeholder communication
